

IBS-Chain-Spray VivaLub

SKU: 2050247

The IBS chain and rope spray VivaLub was specially developed for the use of permanent internal and external lubrication of fast or slow running drive elements. Ideal for heavy duty use of e.g.: Motorbike and bicycle chains, gear wheels and worm gears, joints, rollers, ball bearings, clutches.

Ideal for high stress on e.g. motorbike and bicycle chains, gears and worm gears, joints, rollers, ball bearings, clutches.

Technical application advantages

- Synthetic lubricant - therefore no resinification possible
- intensive long-term internal and external lubrication of various drive elements without relubrication device
- Extremely high adhesion - due to specially added additives
- Excellent creep and splitting properties
- protection of chains and ropes etc. against any kind of wear
- Temperature resistant from -30°C to 150° C

This product is available as a 500ml spray can. The packaging unit (minimum order quantity) is 1 box of 12 spray cans.

Technical data

Colour:	yellowish
Odour:	species-typical
Temperature range:	-30° to 150° C
Silicone-free:	Yes
Pressure resistant:	Yes
Propellant gas:	Propane/butane
Contents:	500 ml
Labelling:	GHS02,GHS07
