

## IBS-Special Cleaner Purgasol

**SKU:** Purgasol

Ideal for applications where the coarsest oil and grease contamination is to be removed without problems and a fast and even evaporation / drying of the cleaning agent is to be ensured.

### Description

This cold cleaner is a petroleum-based hydrocarbon mixture that is suitable for manual cleaning of oil and grease soiling on metal parts and surfaces. It can be used in a brush-wash process, for surface degreasing and in an immersion or wiping process.

### Advantages

- The cold cleaner is non-corrosive and protects the metal surface from corrosion during application.
- It evaporates quickly and evenly so that the cleaned parts can be processed quickly.
- The cold cleaner has a high flash point ( $> 61^{\circ}\text{C}$ ), which ensures a high level of safety and occupational safety.
- It is environmentally friendly and cost-efficient as it can be used without heating.
- The cold cleaner is dermatologically safe and has the "Low-emission product" seal of approval from BG ETEM.

### Areas of application

Repair, maintenance and servicing workshops of all kinds (agricultural machinery, construction machinery, rail vehicles, industrial trucks, lorries and cars). car workshops as well as in machine and tool construction).

### Technical data

Container size:	200 L, 25 L, 50 L
PH value:	Substance is not water soluble
Odour:	mild - characteristic
Colour:	colourless
Flash point:	$> 61^{\circ}\text{C}$
Density:	$0.77 - 0.79 \text{ g/cm}^3$
Evaporation number:	212
Breakdown voltage:	70 KV/cm

Labeling: GHS08
